

MODULAR DOCKS

Infinite solutions

rotaxmarine.com

A rotomoulding specialist for over 25 years

Experts in the manufacture of unsinkable components

FROM THE MANUFACTURER

Our products are made in France in our factory. We have total control on our production planning ensuring short delivery timelines.

EXPERTISE

Rotomoulding has been our core business for over 25 years. This process allows us to manufacture hollow plastic parts without welding, ensuring strength and reliability.

EXPERIENCE

150,000 tonnes of floating components manufactured for harbours and pleasure craft all over the world

LEADER

We operate on all continents thanks to our network of agents and distributors

OUR MODULAR RANGE

Durable modules for permanent or temporary installations

- › Easy to install and customisable configuration
- › Wide range of accessories
- › Low-maintenance
- › Guaranteed stability and safety
- › Non-slip surface
- › 100% Recyclable

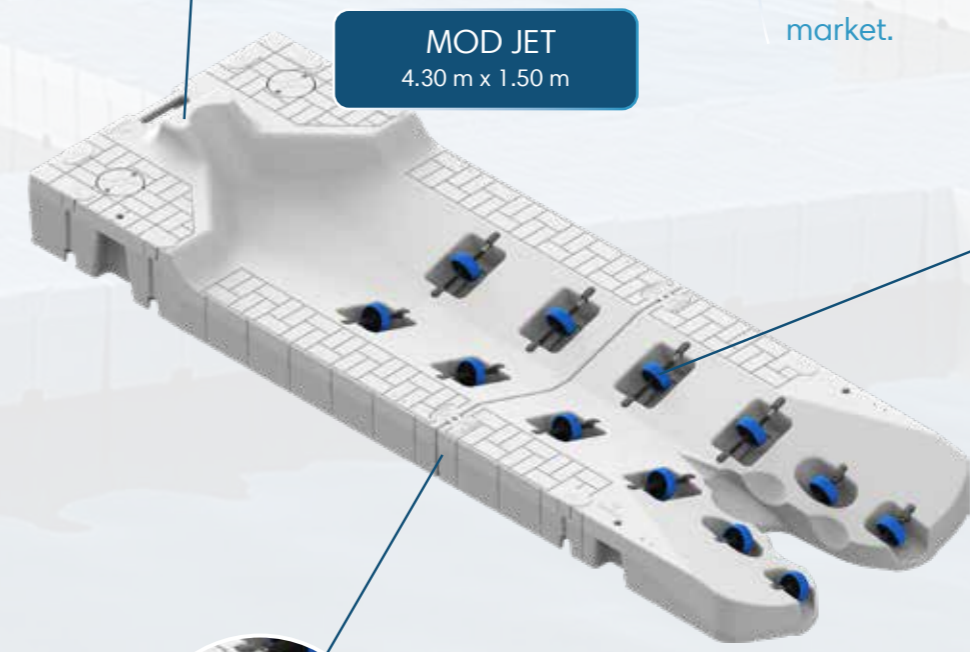

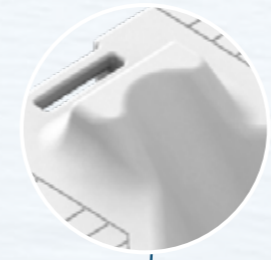

Pocket fillers

Connection system

Flexible connector
Patented flexible connector technology allows our docks to be installed on rough waters.

End stop
The MOD JET's end stop allows safe and reliable mooring.

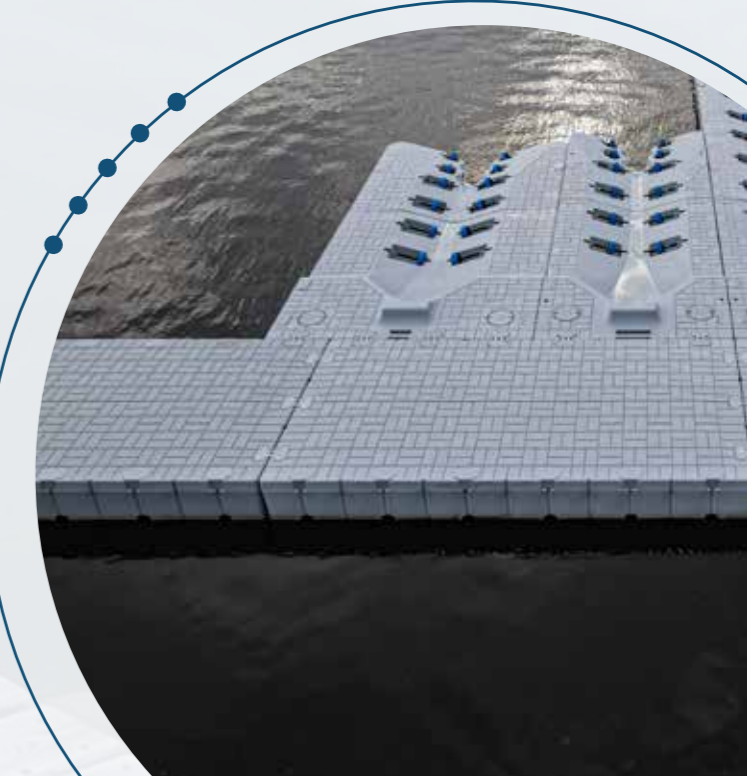

MOD JET
4.30 m x 1.50 m

Adjustable rollers
Thanks to side-adjustable rollers, the MOD JET is both versatile and adjustable, allowing to accommodate even the widest jet-skis on the market.

Two-part design
An innovative two-part design facilitates entry and exit, ensuring permanent contact with the hull of the jet-ski.

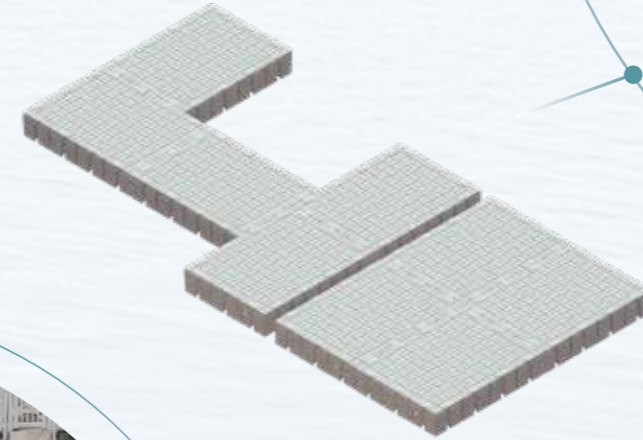

*Licensed by Snap Dock™

INFINITE CONFIGURATIONS
